

## Our Ethos and Vision

Our vision is to provide an inclusive practise supporting each individual child's holistic development and prepare them with positive foundations from which they will continue to grow.

Tam's House is a small independent nursery which follows the Montessori Philosophy and the EYFS. We believe in keeping our classes small to promote strong bonds not only with the staff and other children but between the families as well. Catering for a small number of children means we can ensure each child's interests, strengths and weaknesses are recognised and the environment can be prepared to meet those needs.

In this home from home environment, much thought and care goes into the activities created for the children to access. The Montessori trays use the most natural of materials to stimulate a child's senses and desire to want to explore, experiment and create. Outside music lessons and Spanish classes provide new opportunities. This combined with in the moment planning and organised experiences, stimulates children's imagination and provides them with a better understanding of the world around them.

At Tam's House we believe working in partnership with the parents. As well as meetings to discuss developments, we use daily diaries to detail their day, wellbeing and capture moments with monthly photo galleries. Our monthly projects on topics of interest also provide opportunities for parents to share and explore with their child at home.

Our garden is organised to promote not only a child's physical and social development but their innate curiosity. We have worked together to obtain an Eco School Green Flag status which not only teaches the children about the environment, but introduces them to and benefits the local community as well.

At Tam's House we want all the children to feel loved and nurtured; arming them with as much experience, knowledge and confidence to develop and follow their own passions.
